We Deliver Outcomes

Driven by unique differentiation in **native flash management**, a **modern SW** architecture, and a focus on **simplicity and management at scale**

50%* Lower Total Cost of Ownership

2-5x* More Power and Space Efficient

10-30x
Fewer Service Visits, Significantly More Reliable

Products are Never Obsolete
Always-Improving Life cycle

Consolidation of All Tiers
1 HW/SW Design, 2 Architectures

Significant Time Savings
Automation-Driven Cloud Operating Model

Addressing Growing Challenges

Need for Improved Efficiency in All Areas

Where disk underdelivers

Disk and inefficient silos are holding you back

Too much **space**

Imagine needing 10x the space of your current disk-based storage.

Too much **energy**

10x the energy-usage as costs continue to climb.

Too many **resources**

More racks, more complexity, more e-waste, more FTEs.

Hard drives are done. SSDs are not the answer.

SSDs were the easy answer,
but inherently inefficient

SSDs are hitting a wall, limited by
firmware, DRAM, density,
efficiency, reliability

**All “Flash” were not Created Equal -
SSDs will fall further and further behind**

Key Technologies

DirectFlash®

Hardware / software co-design
for maximum efficiency

FlashArray™ & FlashBlade®

Exascale platforms

Evergreen®

Architected flexibility, delivered as
compelling business models

Pure Fusion™

Storage-as-code to enable
autonomous data mobility

Portworx®

Container-native platforms
and data services

A FlashArray for Every Business Need

From demanding databases to virtualized workloads to large-scale data repositories

FlashArray **//X**

As low As 250µs Latency
Mission-critical applications
Workload consolidation
Virtualized environments

FlashArray **//XL**

Up to 36GB/s Throughput
Most-demanding critical applications
Extreme workload consolidation
Large-scale virtualized environments

FlashArray **//C**

Up to 9PB effective capacity
Business-critical workloads
Disaster recovery & data protection
Test/dev environments

FlashArray **//E**

Scales from 1 to 4PB
Unified file and block data
Large-scale data repositories
Data protection snapshots
Log/cold data archives

FlashBlade **//E**

Pure **//E** Family

Scales from 4PB to 10+PB
Unified file and object data
Largest-scale data repositories
Video content libraries
Healthcare imagery

The All-Flash Industry Leader

From entry-level to enterprise

Run everything from large databases to next-gen cloud-native applications

Consolidate more business services on fewer arrays with exceptional density

Unify block and file workloads with support for ethernet and fibre channel environments

UPGRADE NON-DISRUPTIVELY with Pure's unique Evergreen storage experience

FlashArray 

Speed Up Backup and Restore with FlashArray//C

Data protection that's integrated with your preferred backup provider

High performance to reduce RPO and RTO

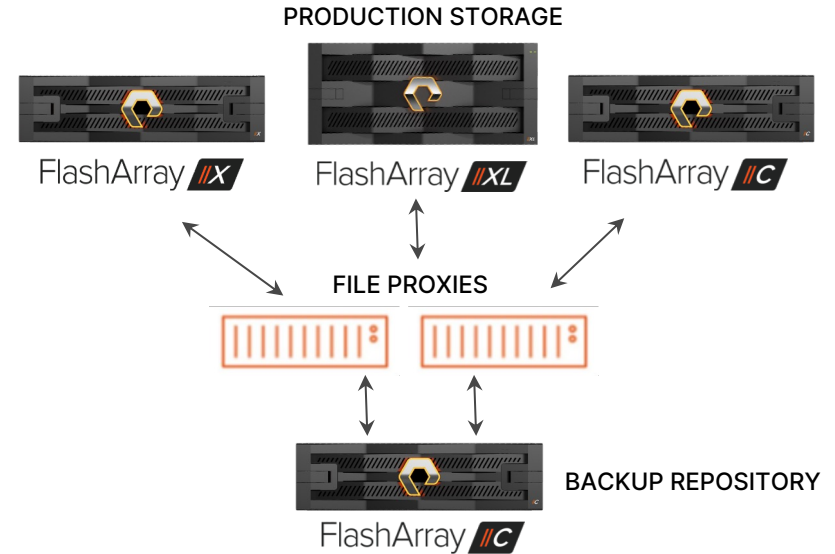

- Backup with consistent speeds up to 10TB/hour
- Restore with consistent speeds up to 10TB/hour

Both snapshots and image-level backups

- Instantaneously snapshot any FlashArray volume
- Up to 5:1 data reduction reduces capacity costs

Highly available and efficient

- Always-on data reduction to reduce capacity
- 99.9999% of availability prevent data any loss
- Ransomware protections for fast, complete recovery

Innovation without Delay with Evergreen

Choose the purchasing model that works best for your business

Evergreen™ //Forever

Traditional purchase with ongoing subscription to software and hardware upgrades

Buy it once, use it forever

Storage ownership combined with subscription to software and hardware upgrades and world-class customer experience.

Evergreen™ //Flex

Hardware ownership with usage-based capacity and software subscription

Flexibility with control

Own and control the hardware with the flexibility to pay for the subscription based on utilization of purchased capacity.

Evergreen™ //One

SLA-driven Storage-as-a-Service

Ultimate storage subscription

SLA-driven storage service for customers that want cloud operations and cloud economics for their on-premises or hybrid data centers

Pure Storage is a Leader for 10 Consecutive Years!*

A Leader in the 2023 Gartner® Magic Quadrant™ for Primary Storage

Source: Gartner Magic Quadrant for Primary Storage, by Jeff Vogel, Joseph Unsworth, Chandra Mukhyala. Published 18 September, 2023.

This graphic was published by Gartner, Inc. as a part of a larger research document and should be evaluated in the context of the entire document. The Gartner document is available upon request from Pure Storage.
